EDUCATION

San Francisco State University, San Francisco, CA	08/2022
Bachelor of Science in Computer Science (GPA 3.75)	
Green River Community College, Auburn, WA	06/2022
Associate Degree in Science	

RELEVANT COURSE WORK

- Software Engineering, Software Development, Algorithm analysis, OS Principles, Programming Paradigms & languages, Data Structures

PROJECT

San Francisco State University, San Francisco, CA	
Lambda Vibe	01/2022 – 05/2022
Full-Stack	
<ul style="list-style-type: none">• Created responsive instrument for users to interact and produce music by utilizing keynote• Made a database to record, store, and play keynotes for the user's selected instrument• Constructed a visualizer to display the sound wave animation of the user's keynote played• Provided a system of filtering in the search bar to locate user's desired pre-recorded music	
RoomMe	
Front-End	08/2021 – 12/2021
<ul style="list-style-type: none">• Build a responsive multi-platform website that generates housing listing for owners to rent out to students, and for students who are looking for a roommate• Provided the ability to filter amenities required in a room and by interest desired in a roommate• Assembled a database to store metadata such as, location, pricing, leasing, occupancy, etc.• Implemented a user account system to provide users with an identity on the website to browse, list, post, and find a roommate	

EXPERIENCE

Sony Authorized Service Centre, Malaysia	04/2020 - /10/2020
Software Engineering Intern	
<ul style="list-style-type: none">• Assisted team with hardware, software configuration, setup and troubleshooting to maintain system functions• Supported supervisors with software errors and technical support tasks• Helped with technology usage to customer and teaching them how to troubleshoot their devices• Composed test cases to make adaption to the requirements software components• Analyze software usability and performance, making recommendation to improve efficiency	
BMW FM Autohaus, Malaysia	02/2018 – 07/2018
Software Engineering Intern	
<ul style="list-style-type: none">• Assessed database error root causes, aiding diagnostic checks and performance investigations• Aided team with software programs and operational framework for debugging and fixes• Diagnose computer hardware, and software issues and worked with technicians and supervisors to facilitate adjustment for end users• Collaborated with supervisors and colleagues to create new database to store orders tracking system to increase overall efficiency	

SKILLS

Computer Skills: C++, C#, C, Java, JavaScript, Python, React, TypeScript, HTML, CSS
Language Skills: English, Malay, Indonesian, Mandarin, Korean
